Lecture 4 - Convolution (During Lecture)

1. **In the folder "`SyS 1 - Lecture 4`"[1] you will find five recordings of several sounds: an accordeon, a piano, a speach, a rock band and the voice of a soprano singer. Reproduce each of this signals in the precinct of which you have the impulse response (Hint:** use the `conv` function**)**

2. **In the same folder, you will find the impulse responses of a recording studio, the "Plaza Che" and a cathedral. Reproduce each of the five recordings (accordeon, piano, speach, rock band and voice of soprano singer) in the aforementioned places**

3. **Discuss with your team and answer the proposed questions. The questions are found in Google Form, posted on the Google Classroom of the course**
